*Zefyr Case Study
Job 826 - School*

Bath Spa University

Zefyr designed, manufactured and installed vertical solar shading and access hatches to a new building for Bath Spa University. Zefyr Installed three types of solar shading systems, two types of aerofoil blades and bespoke terracotta baguettes. Up curb access hatches were installed to the roof and ground floor levels of the building, the majority being single door access hatches with a few bespoke multi door access hatches.
